How to create a new page

Choose **“Home / New slide"** to open a menu of the theme layouts.

Once the new slide has been added, you can change the layout by choosing **“Home / Layout”.**

For Finnish and more instructions, see the notes to this slide.

Accessibility of presentations

The goal has been to take accessibility requirements into account in the layout of the PowerPoint template, but if you share your PowerPoint presentation online, check the following

- Give the file a clear name:
  the file name describes briefly what the presentation is about; also add a heading to the representation
- Add an alternative text (alt text) to pictures
- Give descriptive visible text for links
- Check the reading order
- Check accessibility

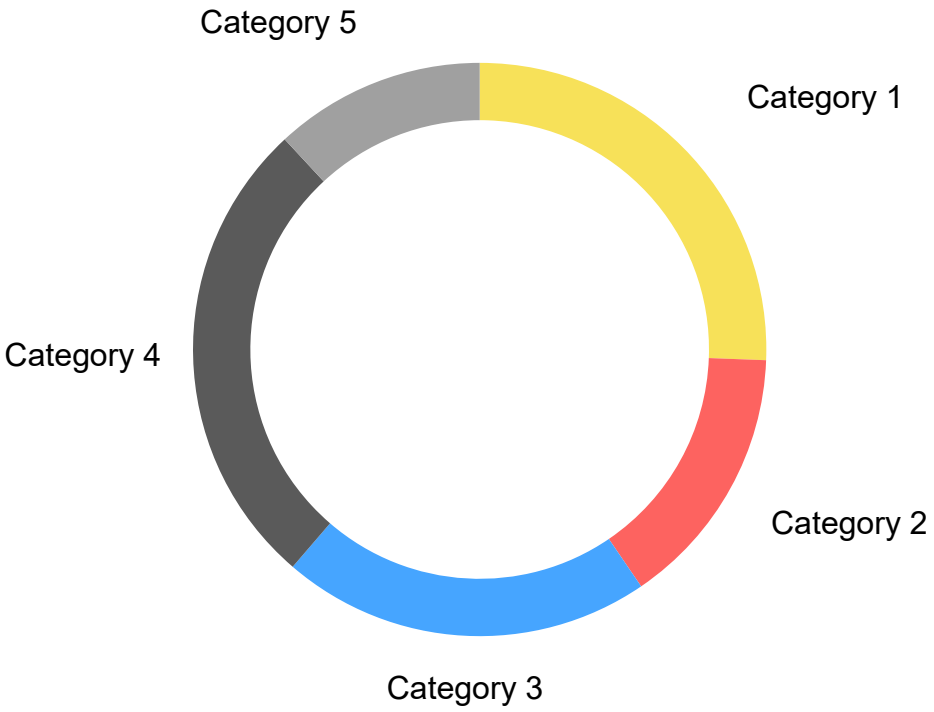

Practical instructions on how to do this can be found at **https://www.saavutettavasti.fi/saavutettavat-asiakirjat/powerpoint/** (in Finnish)

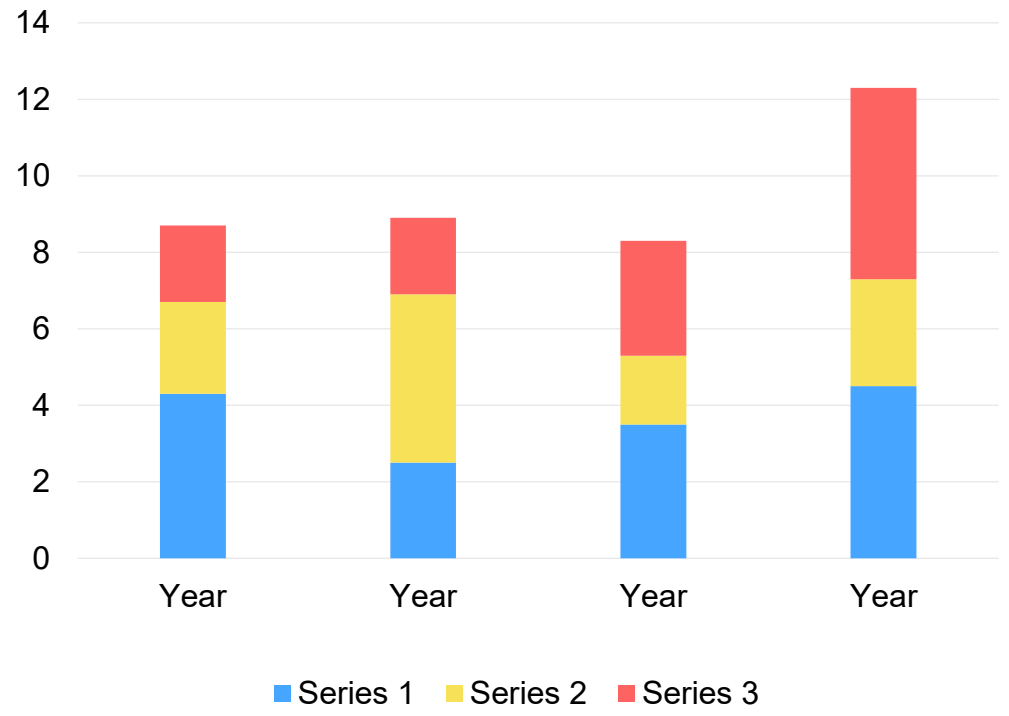

and (for different software versions and operating systems) **here**

For Finnish, please read the notes.
